Name: $\qquad$ Key $\qquad$ Unit Six: Probability - Frequency Tables (IC4)

Date: $\qquad$ Period: $\qquad$

## 1. Determine the information from the two way frequency table.

The boys and girls of a class were surveyed about whether they liked to swim or ski. The two way table shows the results of the survey.
$\begin{array}{lc}\text { a) How many students in the class? } & 28 \\ \begin{array}{lc}\text { b) How many girls in the class? } & 12 \\ \text { c) How many students like to ski? } & 15 \\ \text { d) How many boys like to swim? } \\ \text { e) How many girls don't like to swim? } & -5\end{array}>\end{array}$

|  | Swim | Ski | Total |
| :---: | :---: | :---: | :---: |
| Boys | 6 | 10 | 16 |
| Girls | 7 | 5 | 12 |
| Total | 13 | 15 | 28 |
|  |  |  |  |

f) What is the probability that a student likes to swim?
$\frac{\frac{13}{28}}{\frac{16}{28}}=\frac{4}{7}$
g) What is the probability that a boy was selected? $\quad \frac{1}{28}=\frac{4}{7}$ $\underline{\frac{7}{28}=\frac{1}{4}}$
h) What is the probability that you select a girl that likes to swim?

$$
\frac{28}{28}=\overline{4}
$$

i) Given that a boy was selected, what is the probability that he likes to ski? ${ }_{7} \frac{10}{16}=\frac{5}{8}$
j) Given that they like to swim, what is the probability that it is a girl? $\qquad$ 13

The class had been surveyed about who had been to Canada, Europe or both. The two way table shows the results of the survey.
k) How many people were surveyed?
I) How many people had been to Canada?

| 34 |
| ---: |
| 25 |
| 7 |
| 3 |

|  | Europe | Not Europe | Total |
| :---: | :---: | :---: | :---: |
| Canada | 3 | 22 | 25 |
| Not Been to Canada | 2 | 7 | 9 |
| Total | 5 | 29 | 34 |

n) How many people had not been to either?
$\qquad$
$\frac{3}{34}$
p) What is the probability that a student had been to Canada and Europe?
$\square$
q) What is the probability that a student had been to Europe but not Canada?
r) What is the probability that a student had been to Canada? __ 34
$\frac{2}{34}=\frac{1}{17}$
s) Given that they had not travelled to Europe, what is the probability that they had been to Canada? $\qquad$ $\frac{22}{29}$

## 2. Complete the two way frequency tables.

a) Students were asked in Middle and High School which they liked more, Math or English. Complete the two way table from the given information. 13

|  | Math | English | Total |
| :---: | :---: | :---: | :---: |
|  | Middle | 25 | $\mathbf{1 8}$ |
| $\mathbf{4 3}$ |  |  |  |
| High | $\mathbf{1 9}$ | 12 | $\mathbf{3 1}$ |
| Total | 44 | 30 | $\mathbf{7 4}$ |
|  |  |  |  |

b) Girls and boys were asked about what their favorite color was of the four given. Complete the two way table from the given information.

|  | Red |  |  |  |  |
| ---: | :---: | :---: | :---: | :---: | :---: |
|  | Green Blue Yellow Total |  |  |  |  |
| Male |  | $\mathbf{3}$ | $\mathbf{1 0}$ | 1 | $\mathbf{2 7}$ |
| Female | $\mathbf{6}$ | $\mathbf{8}$ | 4 | $\mathbf{7}$ | 25 |
|  | $\mathbf{1 4}$ |  |  |  |  |
|  | $\mathbf{1 9}$ | 11 | $\mathbf{1 4}$ | 8 |  |
|  |  |  |  |  |  |

## 3. Complete the two way tables.

In the class of 24 boys and 10 girls a survey was given about whether they liked Justin Bieber or Katie Perry. 20 boys liked Katie Perry and 9 of the girls liked Justin Bieber. Complete the two way table.

|  | Justin | Katy | Total |
| :---: | :---: | :---: | :---: |
| Boys | 4 | 20 | 24 |
| Girls | 9 | 1 | 10 |
| Total | 13 | 21 | 34 |

## 4. Boys and girls were asked whether they liked meat or peanut

 butter sandwiches for lunch.a) Give a joint frequency value for the boys: 10,18
b) Give the marginal frequency value for meat: $\qquad$
c) How many students were surveyed? $\qquad$ 58

## 5. Complete the two way tables and determine the requested probability.

a) A class of 35 students were asked if they were members of the chess club or math club. 16 were in the chess club, 10 were in both, 9 students weren't in either club.
$\mathrm{P}($ math club $)=\underline{\frac{20}{35}=\frac{4}{7}}$

| Math |  | No Math Total |  |
| :---: | :---: | :---: | :---: |
| Chess | 10 | 6 | 16 |
| No Chess | 10 | 9 | 19 |
| Total | 20 | 15 | 35 |
|  |  |  |  |

b) 15 boys and 20 girls were surveyed about music preference between Top 40 and 80's music. 25 students picked Top 40, and 2 girls picked 80 's music.
$P($ Boy and Top 40's $)=\underline{\frac{7}{35}=\frac{1}{5}}$

|  | Top 40 |  |  |
| :---: | :---: | :---: | :---: |
| Boys 80 's | Total |  |  |
|  | 7 | 8 | 15 |
| Girls | 18 | 2 | 20 |
| Total | 25 | 10 | 35 |
|  |  |  |  |

c) 62 people were interviewed about whether they had an iPhone and iPad. 30 had an iPhone but not an iPad, 12 had neither, and 14 had both.
$\mathrm{P}(\mathrm{iPad})=\underline{\frac{20}{62}=\frac{10}{31}}$

|  | iPad |  | No iPad |  | Total |
| ---: | :---: | :---: | :---: | :---: | :---: |
| iPhone | 14 | 30 | 44 |  |  |
| No iPhone | 6 | 12 | 18 |  |  |
| Total | 20 | 42 | 62 |  |  |
|  |  |  |  |  |  |
